

Just a Reminder . . .

It's time for your vacuum pump's maintenance check-up

While Busch R5 Series high performance vacuum pumps require very little routine preventative maintenance, to insure long service life & optimal performance, always use quality Busch replacement parts & vacuum pump oil. Your pump will thank you!

Recommended Maintenance Schedule:

Change oil* & oil filter every 750 – 1000 hours or as needed
 Change exhaust filter(s) every 9-18 months or as needed
 Inspect inlet filter weekly, replace as needed

*When using Busch R530 mineral oil. Longer drain intervals are possible with optional Busch lubricants.

Pump Size	Vacuum Pump Oil	Spin On Oil Filter	Exhaust Filter Kit	Paper Inlet Filter Cartridge
0010, 0016	R530		993.062.02	532.005.00
